

Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC)

HEDIS® Measurement Year 2022 Measures

Measure Description: The percentage of members 3–17 years of age who had an outpatient visit with a PCP or OB/GYN and who had evidence of the following during the measurement year.

- BMI percentile documentation*
- Counseling for nutrition
- Counseling for physical activity

***Because BMI norms for youth vary with age and gender, this measure evaluates whether BMI percentile is assessed rather than an absolute BMI value.**

Eligible Population

Percentage of members 3–17 years of age who had an outpatient visit with a PCP or OB/GYN and who had evidence of the following during the measurement year:

- BMI Percentile documentation
- Counseling for nutrition
- Counseling for physical activity

Strategies for Improvement

- Utilize NCQA coding tips to actively reflect care rendered.
- Document BMI percentile, discussion of nutrition and physical activity during at least one office visit annually e.g., sick visit or well-child exam.
- Document all screenings in the medical record, including follow-ups, results and anticipatory guidance given.

Numerator Codes

The complete NCQA approved code set list can be referenced in the coding guide at healthplan.org/providers/patient-care-programs/population-health.
