

Chlamydia Screening in Women

HEDIS® Measurement Year 2022 Measures

Measure Description: The percentage of women 16-24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year. Members are identified as being sexually active by a pregnancy test or diagnosis, sexual activity or contraceptive prescriptions being captured via claims.

Eligible Population

- Women ages 16-24 years old as of December 31 of the measurement year.

Strategies for Improvement

- Incorporate a sexual history into the History and Physical.
- Screen all sexually active women for chlamydia through age 25.
- Educate members on sexually transmitted diseases and include signs, symptoms, and treatment.
- Educate members about safe sex and abstinence.
- Document all screenings in the medical record, including follow-ups, results, and abnormal findings.

Numerator Codes

The complete NCQA approved code set list can be referenced in the coding guide at healthplan.org/providers/patient-care-programs/population-health. For questions, please contact your practice management consultant. To identify your practice management consultant please refer to healthplan.org/providers/overview/meet-provider-servicing-team
