

Childhood Immunization Status (CIS)

HEDIS® Measurement Year 2023

Measure Description: The percentage of children who turned 2 years of age during the measurement year and had the following vaccinations, with different dates of service, on or by their second birthday: DTaP, IPV, HepB, HiB, HepA, MMR, VZV, PCV, RV, and Influenza.

Eligible Population

Members turning 2 years of age as of December 31 of the measurement year.

Measure Compliance (numerator)

- MMR One measles, mumps and rubella vaccine on or between the child's first and second birthday or history of measles, mumps or rubella.
- HepB Three hepatitis B or history of hepatitis illness.
- VZV One varicella zoster e.g., chicken pox vaccine on or between the child's first and second birthday or history of varicella zoster illness.
- HepA One hepatitis A vaccine on or between the child's first and second birthday or history of Hepatitis A illness.
- Influenza At least two influenza vaccinations. Vaccines administered prior to 6 months do not count. New addition of LAIV vaccination must occur on child's second birthday.

The following vaccines, if administered prior to 42 days after birth do not count:

- DTaP Four diphtheria, tetanus, and acellular pertussis vaccines on different dates of service.
- **IPV** Three polio vaccines on different dates of service.
- **HiB** Three Haemophiles influenza type B vaccines on different dates of service.
- PCV Four pneumococcal conjugate vaccines on different dates of service.
- RV Two or three dose rotavirus or at least one dose of the two-dose rotavirus vaccine and at least two doses of the three-dose rotavirus vaccine on different dates of service.

Required Documentation

For immunization evidence obtained from the medical record, evidence that the immunization antigen was rendered from one of the following is required:

- A note indicating the name of the specific antigen and the date of the immunization.
- A certificate of immunization prepared by an authorized health care provider or agency including the specific dates and types of immunizations administered.

For documentation history of illness or a seropositive test result, there must be a note indicating the date of the event, which must have occurred by the member's second birthday.

Strategies for Improvement

- Utilize NCQA coding tips to actively reflect care rendered.
- Outreach parents to schedule their child's vaccination appointments.
- Educate staff to schedule visits within guideline time frames.
- Review immunization records/encourage the opportunity to catch up on missing immunizations at each appointment.
- Educate parents on vaccinations, the side effects, and perceived links to autism.
- Advise parents on the importance of completing each vaccine series.
- Provide handouts on the diseases that the vaccines prevent.

Numerator Codes

The complete NCQA approved code set list can be referenced in the coding guide at healthplan.org/providers/patient-care-programs/quality-measures.

For questions, please contact your practice management consultant. To identify your practice management consultant please refer to

healthplan.org/providers/overview/meet-practice-management-consultant.

Hybrid Measure Note:

The CIS measure is hybrid. Any care missed via claims during the measurement year will result in medical record requests in the HEDIS Medical Record Review Project.

The Health Plan has a team of member advocates, health coaches, social workers and nurses who can assist you and your patients to remove or overcome any barriers to care through benefit assistance, community resource referrals or enrollment in a THP clinical program. To refer a patient who is a THP member for assistance, call 1.877.903.7504 and let us know what we can do to help your patient receive and adhere to your recommended plan of care.
